Do YOU or THINK YOU have any of these or hidden qualities mentioned in the definition?

When you hear the names: Astarte, Diana Ishtar, Inanna, Freya, Aine, Branwen, Philotes, Aphrodite, and Venus does your heart beat faster and a deep longing stir within your soul?

Do you suspect that you may have a "Secret Calling" that is waiting to be awakened, but you don't know how or why?

Discovering your Life Path as a "Goddess" sometimes takes years, and such discovery are confusing for most of us, and guidance on how to find a path is only marginally available in our culture.

### THE GODDESS...

For centuries of unwritten history the "Goddess" teachings were practiced quietly, these secret rites and rituals were handed down from woman to woman in temples and mystery schools in these flourishing matriarchal societies... . The importance of fertility in crops, domesticated animals, wild animals and in the tribe itself was of paramount importance to survival. The female life-giving principle was considered divine and a great mystery; she was considered the goddess of ALL vegetation, lowlands, gardens, blossoms, the budding earth, and human love. To this day Goddess statues still survive from this era.

### THEN CAME MAN...

They brought with them some of the "refinements" of modern civilization: the horse, building, war, belief in male Gods, and exploitation of nature... Goddess worship was gradually combined with worship of male Gods to produce a variety of Pagan religions throughout the Old World. The invention of writing *rewired* the human brain, with profound consequences for culture literacy and reinforced the brain's linear, abstract, predominantly masculine left hemisphere at the expense of the holistic, iconic feminine, creative right one. This shift upset the balance between men and women initiating the disappearance of Goddesses and the decline of women's political status. Patriarchy society now ruled!
